Ensure safe and efficient mobility

End-to-end solutions that improve mobility and safeguard road users.
The rising importance of road transport in everyday commercial and personal activities creates many challenges. Governments and transport authorities must address traffic-related problems such as congestion, air pollution and road accidents. Beyond straining healthcare infrastructure and costs, these issues impact workforce productivity. Rising fuel and maintenance costs affect the bottom line of transportation-related businesses like car dealerships, repair shops, leasing companies, fleet management companies and car manufacturers. These businesses have to find ways to streamline processes to maintain a competitive edge. Drivers need to have their vehicles inspected according to regulatory requirements. They also require expert advice when assessing damages or buying and selling a used vehicle.

TÜV SÜD has a global network of experts in automotive safety and quality standards. Our services cover the needs of all stakeholders, from governments to businesses and private individuals. For authorities, we provide advice on the legal framework, transport inspection solutions, environmental standards and future needs for green mobility. For businesses in the transportation sector, we serve as a trusted partner for optimising your operations and profitability. Private individuals also stand to benefit from our automotive services that include periodical technical inspections, used vehicle evaluations and damage assessment reports. Whatever your specific requirements, the nearest TÜV SÜD office can provide all the support you need.

Establishing safer roads and efficient transportation

As people around the world become increasingly urbanised, governments, individuals and businesses must confront the financial, environmental and social costs of mobility. Ever since introducing uniform testing criteria for vehicles over 100 years ago, TÜV SÜD has been working to make mobility safer. We are constantly looking ahead, developing innovative solutions to meet current and future mobility demands. Our experts can provide you with a complete range of automotive, transportation and road safety solutions, all backed by TÜV SÜD’s global experience and expertise.

Trusted services for mobility stakeholders

Solutions tailored to the evolving needs of transport authorities, businesses and drivers

The rising importance of road transport in everyday commercial and personal activities creates many challenges. Governments and transport authorities must address traffic-related problems such as congestion, air pollution and road accidents. Beyond straining healthcare infrastructure and costs, these issues impact workforce productivity. Rising fuel and maintenance costs affect the bottom line of transportation-related businesses like car dealerships, repair shops, leasing companies, fleet management companies and car manufacturers. These businesses have to find ways to streamline processes to maintain a competitive edge. Drivers need to have their vehicles inspected according to regulatory requirements. They also require expert advice when assessing damages or buying and selling a used vehicle.

TÜV SÜD has a global network of experts in automotive safety and quality standards. Our services cover the needs of all stakeholders, from governments to individuals. For authorities, we provide advice on the legal framework, transport inspection solutions, environmental standards and future needs for green mobility. For businesses in the transportation sector, we serve as a trusted partner for optimising your operations and profitability. Private individuals also stand to benefit from our automotive services that include periodical technical inspections, used vehicle evaluations and damage assessment reports. Whatever your specific requirements, the nearest TÜV SÜD office can provide all the support you need.
Complete solutions for safe mobility

TÜV SÜD provides turnkey mobility solutions that address the interrelated needs of authorities, businesses and individuals in all markets. With our expertise in testing, inspection, auditing, certification, training and knowledge services, stakeholders are better able to navigate requirements for transportation and road safety.

World-class expertise
TÜV SÜD has 100 years of experience in providing mobility solutions worldwide. We are the only company that has successfully implemented a modern system for vehicle inspections at a national level. Each year, we conduct more than 14 million periodical vehicle inspections: 6 million in both Germany and Turkey, as well as other markets such as Austria, France, Italy, South Africa and Spain.

Value-added services
TÜV SÜD’s complete suite of services supports your needs throughout the value chain. Given our wide breadth and depth of experience in the automotive and transportation sector, we can identify areas of improvement and customise solutions that deliver tangible benefits to your organisation.

Independent and impartial
Around the world, businesses and governments place trust in TÜV SÜD as an independent and impartial third-party technical service provider. We are audited regularly to national and international standards and focus on adding value to our stakeholders rather than shareholders.

Risk management
Our experts adopt a holistic approach that addresses all of your organisation’s safety, financial and operational risks. With our strict commitment to quality, we ensure your overall risks are minimised while operating under optimal conditions.

Why choose TÜV SÜD?

Your benefits

Reliable partnership – TÜV SÜD provides independent advice and solutions that you can rely on to achieve optimum results.

Enhance credibility – Working with TÜV SÜD enhances your credibility as a premium organisation that is committed to safety, quality and efficiency.

Single-source provider – Our complete range of services offers you the convenience and accountability of working with one trusted partner for all your automotive needs.

Customised solutions – TÜV SÜD understands that each organisation has unique needs and challenges. Hence, we provide turnkey solutions that meet your specific objectives and requirements.

Peace of mind – Our solutions provide governments, organisations and individuals the peace of mind they need to focus on their priorities.

Competitive edge – We provide business solutions that streamline processes, optimise revenue and maximise profitability to give your business a competitive edge in the market.

Over 800 locations in 40 countries globally
TÜV SÜD’s global operations
